Course Description

Developed by the New York State Department of Environmental Conservation, the Basic Wildland Search and Rescue course teaches the most basic skills needed to conduct a search in the Wildland environment. Topics covered in this course include, basic search organization (Incident Command System), communications, search techniques, attitude and safety. This course concludes with a field exercise to practice the type 3 search technique (grid search) discussed in the classroom. Graduates of this course will receive a "Green Card" which will identify them as having successfully completed this course. This course is also a prerequisite to other more advanced search courses offered by the New York State Department of Environmental Conservation.
